

Styler plugin

Pàgina de proves del [plugin Styler](#).

Cites (Quotes)

Aquest plugin proporciona una versió millorada de la comanda '' que permet l'ús de llistes, donar format, etcètera dins el text citat. Per exemple, `First line. With additional quotation you can: * Use lists; multiple lines? * Use formattings; * Use pictures ; * And many other things. Last line.` dóna lloc a, First line. With additional quotation you can: * Use lists; multiple lines? * Use **formattings**; * Use pictures ; * And many other things. Last line. ===== Capses de text ===== També incorpora comandes per dibuixar capses de text, amb diferents formats i alineaments. ===== Capsa flotant ===== `<style float-right box background>` To place on the right the floating block with a background and border. `</style> </code>` dóna lloc a, `<style float-right box background>` To place on the right the floating block with a background and border. `</style>` que, en tractar-se d'una capsa "flotant" es col·loca al costat d'aquest text en comptes de trencar-lo i generar un espai buit. ===== Capsa centrada ===== `<code> <style center box background>`To place the text on the center`</style> </code>` es tradueix en, `<style center box background>`To place the text on the center`</style>` ===== Altres proves ===== ===== Tres capses de costat ===== `<style background-lorange box-dorange float-left s50>`some text`</style>` `<style background-lblue box-dblue float-left s25>`some text`</style>` `<style background box float-left s25>`some text`</style>` ===== Una capsa dins d'una altra ===== `<style background-lorange box-dorange float-left s50>` `<style background-dgreen center>` **Maybe a title in bold** `</style>` Here your text `</style>`
