

Programari recomanat per Windows XP / Vista

Captura de pantalles

[Gadwin Printscreen](#) - Want to create a screenshot suitable for saving or printing? Then just hit a key on your keyboard. Oh yeah, you'll have to download this program first ([more...](#))

Comprimir fitxers i carpetes

[TUGZip](#) is a powerful award-winning freeware archiving utility for Windows® that provides support for a wide range of compressed, encoded and disc-image files, as well as very powerful features; all through an easy to use application interface and Windows Explorer integration.

Disseny gràfic

Per manipular imatges i fotografies

[GIMP](#) is the **GNU Image Manipulation Program**. It is a freely distributed piece of software for such tasks as photo retouching, image composition and image authoring. It works on many operating systems, in many languages ([more...](#))

[GIMPshop](#) is a free Open Source image editor that is similar to the popular Adobe Photoshop. Specifically GIMPShop is a version of the GIMP that has been edited to be more user-friendly for Photoshop users ([more...](#)).

CAUTION: according to the [GIMPshop entry](#) at the [Wikipedia](#),

GIMPshop for Windows is still under development. The only change to the normal GIMP, other than the menu layout and Photoshop naming conventions, is that it adds a background window to the user interface. This background window causes significant bugs in the Windows version, however, often causing windows to gray out or become unresponsive. It also uses an older version of GIMP, 2.2.11, instead of the current 2.4.1.

Per crear pòsters, llibrets, o fins i tot llibres

[Scribus](#) is an open-source program that brings award-winning professional page layout to Linux/Unix, MacOS X, OS/2 and Windows desktops with a combination of “press-ready” output and new approaches to page layout [W](#) ([more...](#))

Per crear figures, compondre imatges i gràfics, etc.

- Hi ha un manual sobre Inkscape disponible a <http://tavmjong.free.fr/INKSCAPE/MANUAL/html/index.php>

Utilitats per l'administració del sistema

[RootkitReveler](#) - **Important Security Tool** - RootkitRevealer is an advanced rootkit detection utility that lists Registry and file system API discrepancies that may indicate the presence of a user-mode or kernel-mode rootkit. RootkitRevealer successfully detects all persistent rootkits published at www.rootkit.com, including AFX, Vanquish and HackerDefender ([more...](#))

[AutoRuns](#) - This utility, which has the most comprehensive knowledge of auto-starting locations of any startup monitor, shows you what programs are configured to run during system bootup or login, and shows you the entries in the order Windows processes them. These programs include ones in your startup folder, Run, RunOnce, and other Registry keys ([more...](#)).

[Process Explorer](#) - Ever wondered which program has a particular file or directory open? Now you can find out. Process Explorer shows you information about which handles and DLLs processes have opened or loaded ([more...](#)).

[ShareEnum](#) - An aspect of Windows NT/2000/XP network security that's often overlooked is file shares. A common security flaw occurs when users define file shares with lax security, allowing unauthorized users to see sensitive files ([more...](#)).
