

Reserves automàtiques per la Cua de Rutina

 **Fix Me!** explicar el programet per fer les reserves automàtiques per la cua de rutina i les condicions de funcionament de l'espectròmetre

routine_nmr_bookings.sh

Aquest es el programet que crea les reserves per la cua de rutina. S'executa tots els diumenges a les 2 de la matina, i crea les reserves amb dues setmanes d'antel·lació per tal que es puguin modificar si s'escau. El programet també envia un correu electrònic indicant si ha pogut fer les reserves.

[routine_nmr_bookings.sh](#)

```
#!/bin/bash
#
# routine_nmr_bookings.sh
#
# (c) 2013, Miquel Cabanas, SeRMN, UAB
#
# Started writing: 2013/10/14
# Last updated: 2013/10/18
#
# This script runs the MySql commands needed to automatically create
the
# bookings for the routine nmr analysis in the Bruker DPX-250-BACS
shared
# by self-service and programmed samples.
#
# To run this script every Sunday 2am append an entry like,
#
# FIXME 0 2 * * 1 /opt/bmbee-114-1/bin/routine_nmr_bookings.sh
#
# to crontab. This entry means, at minute 0, hour 2, on every (*) day
of
# the month and on every (*) month of the year, if that day happens to
be
# a Sunday (day 0), execute the commands in the script file
# 'routine_nmr_bookings.sh' (this file).

AUTOMATED EMAIL MESSAGE. DO NOT REPLY

SeRMN - Universitat Autònoma de Barcelona

Failed to allocate time slots to the Routine NMR at the Bruker DPX-250 spectrometer on week 42/2013 starting: Sat 2013/11/02.

Please, report this issue to the system administrator.

Aquesta és l'entrada creada al programa crontab per executar automàticament el programet que crear les reserves (crontab -u root -l):

```
# Bumblebee 1.1.4 - Automated bookings fro Routine nmr analysis
# run every Sunday at 02:00.
#
0 2 * * 1 /opt/bmbee-114-1/bin/routine_nmr_bookings.sh
```

Seguretat

Per motius de seguretat (el programet conté el nom d'usuari i clau de pas de la base de dades de reserves) la carpeta /opt/bmbee-114-1/bin/ està protegida i té l'accés restringit,

- permisos carpeta bin: 700
- permisos fitxer routine_nmr_bookings.sh: 700
- propietari (user:group): root:root

A més, per impedir el seu accés a través del servidor web, la carpeta bin conté un fitxer .htaccess amb el següent contingut:

```
order deny,allow
deny from all
```
